They serve you best...
The Chevron-Standard Men
The men who operate Chevron Dealers and Standard Stations are the most experienced men in the service station business.
They've been on their jobs an average of 10 years. That's over twice as long as any other group of dealers.
But the best thing about these experienced men is the warm, friendly welcome they'll give you.

The CHEVRON TRAIL through CALIFORNIA

2 Redwood Empire
Famed for magnificent fern-carpeted redwood groves, preserved in State Parks along U. S. 101, the north coast region also provides miles of streams with fighting steelhead trout, acres of hunting grounds and some of the state's most rugged coastal panoramas.

3 McArthur-Burney Falls Memorial State Park
Birds dart beneath beautiful falls fed by gushing springs in this State Park, located on a lava plateau, in the Pit Rives area.

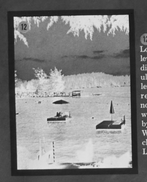
10 Humboldt Coast
Deep sea fishermen know these waters well, for here the ocean gives up some of its finest catches. Redwoods tower in nearby forests where hunters and sightseers find opportunity for enjoyment.

San Francisco-Oakland Bay Bridge
A myriad of things to do and sights to see are offered in San Francisco, "Gateway to the West," and bustling Oakland, linked together by spans of steel.

17 Hearst San Simeon State Historical Mon.
Tours through the fabulous castle with its gardens, swimming pools and guest houses on the "enchanted hill" reveal precious art treasures while zebra, deer and other wild animals roam the area.

15 Southern Beaches
Ocean breezes, cool and fresh, a temperate surf, fine State Parks, fishing piers and miles of wide, clean beaches provide surf and sand fun that attracts thousands from nearby metropolitan areas. There are fishing and excursion boats as well as a passenger ferry to popular Santa Catalina Island.

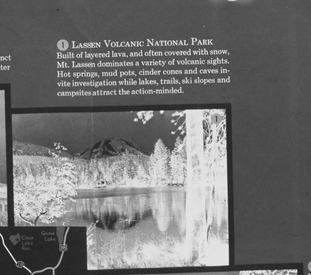
13 San Diego
Only minutes by car to the U. S. border and Old Mexico, San Diego's origin dates back to the first permanent West Coast settlement by Europeans. Old forts and missions provide exceptional historic interest, while Balboa Park offers a wide variety of cultural and recreational activities.



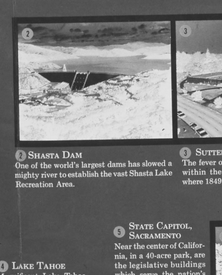
12 Lake Arrowhead
Located a mile above sea level in the San Bernardino Mountains, this popular resort features excellent summer and winter recreation. Especially noteworthy are fishing and winter skiing. Approached by the famed "Rim of the World Drive" this area is close to Palm Springs and Los Angeles.

22 Mt. Shasta
Rising abruptly from the valley floor, this snow-capped extinct volcano, over 14,000 feet high, provides summer and winter vacationing.

1 Lassen Volcanic National Park
Built of layered lava, and often covered with snow, Mt. Lassen dominates a variety of volcanic sights. Hot springs, mud pots, cinder cones and caves invite investigation while lakes, trails, ski slopes and campsites attract the action-minded.



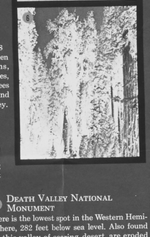
4 Lake Tahoe
Magnificent Lake Tahoe, located high in the Sierra Nevada, centers a region of natural beauty and bountiful recreational opportunity. There are slopes to ski, trails to hike, rushing streams to fish and the lake itself for all water sports. Beautiful homes and world-famous resorts line its shore and gaming is permitted along the Nevada side.



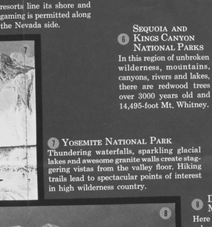
7 Shasta Dam
One of the world's largest dams has slowed a mighty river to establish the vast Shasta Lake Recreation Area.

3 Sutter's Fort, Sacramento
The fever of the Gold Rush days is captured within the walls of this authentic replica where 1849 relics are displayed.

5 State Capitol, Sacramento
Near the center of California, in a 40-acre park, are the legislative buildings which serve the nation's fastest growing state. See Crocker Art Gallery, Governor's Mansion, Sutter's Fort and state museums. Nearby are the Sierra Nevada Mountains, Gold Rush country and exciting vacation wonderlands.

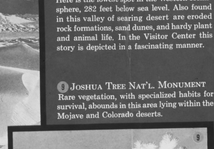


6 Sequoia and Kings Canyon National Parks
In this region of unbroken wilderness, mountains, canyons, rivers and lakes, there are redwood trees over 3000 years old and 14,495-foot Mt. Whitney.

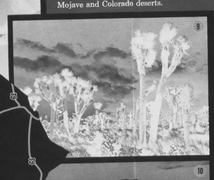


9 Yosemite National Park
Thundering waterfalls, sparkling glacial lakes and awesome granite walls create staggering vistas from the valley floor. Hiking trails lead to spectacular points of interest in high wilderness country.

8 Death Valley National Monument
Here is the lowest spot in the Western Hemisphere, 282 feet below sea level. Also found in this valley of searing desert are eroded rock formations, sand dunes, and hardly plant and animal life. In the Visitor Center this story is depicted in a fascinating manner.



Joshua Tree Nat'l. Monument
Rare vegetation, with specialized habits for survival, abounds in this area lying within the Mojave and Colorado deserts.

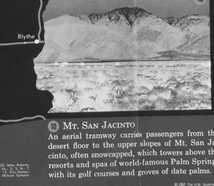


16 Pt. Lobos Reserve St. Park
Near Pt. Lobos, where wind-twisted Cypress cling to rugged cliffs that rise abruptly from the sea, is Carmel with its Mission, quaint shops and white sand beaches. Also in this region are world-famous resorts, golf courses and shoreline drives. Nearby historic Monterey has fishing fleets, shops and wharf restaurants.

14 Santa Barbara Mission
One of California's most beautiful missions, founded in 1786, is in a setting of palm-lined streets and tile-roofed homes. Nearby mountains, State Parks, resorts, and lovely beaches, contribute to the area's vacation appeal.

11 Los Angeles
Art centers, beaches, deserts, gardens, parks, museums, motion picture and television studios are but a few of the many attractions the area has to offer. Fine freeways allow easy access to this collection of sights, sounds and spectacles. Nearby beaches and mountain resorts provide endless recreation.

Mt. San Jacinto
An aerial tramway carries passengers from the desert floor to the upper slopes of Mt. San Jacinto, often snowcapped, which towers above the resorts and spas of world-famous Palm Springs with its golf courses and groves of date palms.



Specific locations of these scenic points-of-interest are indicated on the detailed map of California on reverse side.

GRAND CANYON NATIONAL PARK

The Grand Canyon has tested the descriptive skills of generations of writers. School children learn that "all the people on earth could fit into it." Its moods, mists and color and the fact, although implausible, that the canyon was dug by simple erosion, put the world's other natural phenomena into eclipse. Theodore Roosevelt once said of it: "The one great sight every American should see."

It may be seen from drives along the rim, astride sure-footed mules descending into the canyon floor, by foot trails into the canyon, or even by flight from rim to rim.

The North Rim, with lookouts Royal, Imperial and Sublime, is open mid-May to mid-October. The South Rim, open all year, has its West Rim Drive with golden sunsets at Hopi Point and a unique cliff house at Hermits Rest. On East Rim Drive, the Painted Desert and Navajo Indian country turn the eye at Desert View. The Colorado River beckons from far below at Lipan Point and powerful binoculars may be trained on distant formations at Yavapai Point.

Advance reservations for accommodations and special trips are desirable. For the South Rim write Fred Harvey, Grand Canyon; for the North Rim, write Utah Parks Co., Cedar City, Utah.

Winter Sports in Arizona

Arizona's winter-sports areas offer excellent skiing when snow conditions are favorable.

The areas listed below are developed and have good facilities. Although they are mainly on national forest lands, the ski areas are operated by private individuals.

Rental equipment and food are available at all areas. Other winter sports, such as tobogganing and sledding, may usually be enjoyed at places nearby. In Arizona's high country the skiing season is generally from Christmas to March.

For general ski information write to the State of Arizona Development Board, 1500 W. Jefferson Street, Phoenix.

ARIZONA SNOW BOWL, the state's most popular ski area, is about 15 miles northwest of Flagstaff, on the west side of the San Francisco Peaks, tallest in Arizona. At an elevation of 9,500 feet is a lodge, parking lot, a chair lift, Pomalift and smaller lifts. For further information write to the Flagstaff Chamber of Commerce, Flagstaff, Arizona.

BIG CIENEGA SKI AREA, 18 miles east of McNary. Rope tows. Toboggans for rent.

BILL WILLIAMS MOUNTAIN SKI AREA, five miles south of Williams in Kaibab National Forest. Pomalift, rope tow, ski instruction. For information write Williams-Grand Canyon Chamber of Commerce, Williams.

MT. LEMMON SKI AREA, northeast of Tucson, at 9,100 feet in the cool Santa Catalina Mountains. Pomalift, rope tows and a ski school available. For information write Box 12, Mt. Lemmon, Arizona 85619.

Three Great Gasolines

Gulf produces three grades of gasolines to meet your most exacting needs. The volatility of all three grades is constantly adjusted to insure fast starts on the coldest winter mornings and freedom from vapor lock and stalling during the hottest summer months.

Gulf No-nox — No-Nox® is Gulf's premium grade gasoline, its high octane rating and balanced additives insure top performance in all engines.

Good Gulf — Good Gulf® is Gulf's famous regular grade gasoline. It's the favorite of millions of motorists whose cars do not require a premium grade product.

Gulftane — Gulftane® is an economy grade for cars that don't need extra octane to do their best.

One of these great gasolines is just right for your car.

STONE MOUNTAIN MEMORIAL PARK (16 miles east of Atlanta on U.S. 78). The largest exposed granite dome in North America. It rises 600 ft. above the surrounding plateau, is elliptical in shape and has an area 2 miles long. From the highway it appears to be bare except for a few scrubby pines. The gray color is faintly tinged by the moss and lichen that cover its surface, and deep cracks run in long jagged lines down the slopes. A partially completed Confederate monument has been carved on the sheer northeastern wall. Though granite has been quarried for years, no noticeable change has been made in the mountain's appearance. A new and notable attraction is the Stone Mountain Scenic Railroad which has been designed to provide maximum safety and comfort while still reflecting the flavor of the Civil War railway coaches. During off seasons, a replica of one of Atlanta's first street cars will run in place of the regular steam train.

The settlers who came to mineral-rich Jones Valley early in the 19th Century considered worthless the iron-laden red earth with which the Indians painted their faces. The ensuing development of the coal and iron industries proved them poor prophets.

Since its incorporation in 1871, Birmingham has become Alabama's largest city and the Southeast's industrial capital. Its cultural life has more than kept pace with its industrial growth and each winter world-renowned stars of opera, concert and the ballet arrive for the Festival of Arts.

Scenic drives provide exciting panoramic views of the pine-covered countryside. Luxurious residential areas look down from wooded hillsides on the twinkling lights of the city and the red glow of molten steel in the evening sky.

Medical Center. The Southeast's most important medical facility combining education, research and service covers a fifteen-block area and is administered by the University of Alabama Medical and Dental Colleges. (E-9)

Museum of Art. A recent and valuable addition to the cultural life of Birmingham, this multi-million dollar museum contains, among many popular exhibits, paintings from the world-famous Kress Collection. (G-13)

State Fairgrounds. Spotlighting Alabama's industrial and agricultural progress, the State Fair, in October, combines education with recreation. (F-6)

U.S. Pipe Furnaces. An excellent view of the plant's interior may be obtained from the First Street Viaduct. Flaming, flowing metal lights up the night sky, a spectacular scene. (E-9)

Vestavia Baptist Church. One of the world's most unusual churches is designed after the Temple of the Vestal Virgins in Rome. On Shades Mountain, the grounds are open to public. (G-10)

Vulcan Statue. The largest iron figure ever cast stands 55 feet high on a 124-foot pedestal. Vulcan, mythological god of the forge, surveys the industrial capital of the South from a lovely park atop Red Mountain. (F-9)

Tours by Malcolm Forsyth

TOUR 1

Levee, Delta and Forest
380 Miles

Beginning in the heart of Louisiana at Alexandria, this tour features a scenic section of the famous Great River Road through the fertile Mississippi Delta with its cypress-rimmed lakes and stately woods.

Leave the Alexandria-Pineville area on US 165 and turn east onto State 8 at Pollock. Continue to Trout and join with US 84 east to Ferriday to pick up the Great River Road (US 65) traveling northward.

This is some of the loveliest countryside in Louisiana: vast umbrella-like trees of deep green and shaded landscapes that seem like paintings of another time. Note that the Mississippi flows at a higher level than the land. Without levees, floods would be an ever-present danger. The town of Waterproof derives its name from a "waterproof" hilltop that was the only dry spot during one early flood. The curiously shaped "lakes" along here are ancient river cutoffs. Many old homes in this region merit visits: Myrtle Grove, Melwood, The Burn, Waverree, and General Zachary Taylor's home near Waterproof, and Marydale near St. Joseph, a restored steamboat port on State 128. At Newellton, on State 4, are the Dutch Gardens with broad fields of tulips and an authentic Dutch windmill.

North is Tallulah, a shady-laned cotton town surrounded by lakes and bayous that offer fine fishing, hunting and sightseeing. Lake Providence, further north, is a fishing and water sports center. From here, take State 2 across Bayou Macon through Oak Grove to Mer Rouge to connect with US 165 to Bastrop, an old town whose development has been relatively recent, keyed to industry rather than agriculture. Papermaking is the most noticeable local enterprise here.

US 165 crosses the Ouachita River to Monroe, the largest city in northeast Louisiana. Between Monroe and Ruston, on US 80, the hilly, timbered country of the northeast changes to flat valley lands of farms, dairies and peach orchards. Ruston is also the site of Louisiana Polytechnic Institute.

From Ruston take US 167 south through land rich both in farm soil and timber. Winnfield is significant primarily for its modern history. Its most noted, and still controversial, citizen was Huey P. Long, former governor and senator. The site of his birthplace is marked, and there is a memorial park to his brother, Earl K. Long, who also was governor.

South of Winnfield, US 167 passes through Kisatchie National Forest and the Catahoula National Wildlife Management Preserve in one of the great early timber regions of Louisiana which made many fortunes. Continue through Brantley, a town named for its founder, a turn-of-the-century lumberman, back to Alexandria on the banks of the Red River.

Mississippi River Scene

TOUR 2

Verdant Uplands and Coastal Plain
435 Miles

This tour begins in Shreveport, the thriving industrial and recreational center of northwest Louisiana, and travels from the hilly, wooded west Louisiana uplands to the edge of the Gulf Coastal plain, and up through the valley lands along the Calcasieu and Red Rivers. Included are historic sites, spectacular gardens and many parks and outdoor sports areas.

Leave Shreveport, southward on US 171 for Mansfield, a quiet town which was the scene of a significant Civil War battle. It was here that the Southern battle plan, in which 15,000 Confederates engaged 40,000 Federals, was devised under a large oak on Polk Street. The Mansfield Battle Park State Monument is comprised of a 44-acre section of the battleground, a museum and monuments.

Connect with State 175, east of the city, and proceed to the town of Pleasant Hill, where the Mansfield battle was concluded. The Federal troops fell back to this position and fought the Confederates to a tie. Both sides withdrew from this, the last Civil War battle fought in the state of Louisiana.

Continue on State 175 to Many, a pleasant town which still retains a trace of Spanish influence. Nearby, on State 6, is Fort Jesup State Monument at an outpost established in 1822 by Zachary Taylor when this territory was a "neutral strip" deeded to the United States by Spain. One original log building remains and is restored while another has been reconstructed as a museum.

Sam Houston State Park

Return to Many and continue south on US 171 to the entrance of Hodges Gardens. This 4,700-acre tract was originally planned as a utilitarian reforestation project and has since become Louisiana's year-round "Garden in the Forest." A natural scenic area with an island-studded lagoon, it is further embellished with plantings of a wide variety of domestic and foreign flowers, trees, and shrubs. There are picnic areas, an outdoor theater, a scenic drive and many paths.

Continue on US 171 south to Leesville, founded in 1871 and named for General Robert E. Lee. This is the closest sizable community to Fort Polk, a U.S. Army garrison and training camp.

Leave Leesville on State 467 and turn onto State 10 to return to US 171—a route which goes through a corner of one of the eight sections of the refreshing Kisatchie National Forest.

US 171 leads on to De Ridder, in the center of fertile farmland producing an unusual range of crops from grains to citrus.

South is Sam Houston State Park with picnic, tent and trailer facilities. Sportsmen find excellent fishing in the Calcasieu River which flows through the park.

Follow US 171 into Lake Charles, the closest of the state's deep-water ports to the Gulf of Mexico. It is a city of many contrasts—a combination of Louisiana-French and Texas-western, of small town graciousness and big industry bustle. Boating and water sports dominate the recreational scene. There are two annual Fishing Rodeos, a western rodeo in connection with the Fat Stock Show, and Contraband Days, which feature boat races, water-ski shows, and other aquatic events.

Leave Lake Charles on US 90 eastward and turn north on US 165. This highway traverses a landscape of fertile prairie land and woods rising gradually to hills covered with many types of pine on the approach to Alexandria and Pineville. The two towns face each other across Red River in the geographical center of Louisiana. Alexandria was a busy steamboat port in the era of river commerce and is now an agricultural and business center. Points of interest are the elaborate Bentley Hotel, built in 1908, and the St. Francis Xavier Cathedral. In Pineville are the Mount Olivet Chapel, a charming small wooden church, and the Louisiana College campus.

Leave Alexandria on US 71 and drive through the rolling pine-clad hills along the Red River to a brief detour at Clarence on State 6 to Natchitoches, the oldest settlement in the entire Louisiana Purchase. The area was first explored by LaSalle and the French established a trading post here in 1714, naming it for the local tribe of Indians. Located on Cane River, a state game and fish preserve, it is a lovely community of tree-lined streets and charming homes that blends the old Latin and the new Anglo-Saxon traditions.

Return to US 71 and go through the rising wooded ridgelands to Bossier City, the industrial suburb of Shreveport. There, stop at the Ruins of Fort Smith, a former Confederate defense post and now a memorial, and cross the Red River to Shreveport.

TOUR 3

New Orleans and the Bayous
404 Miles

All the festivity, color and sound of New Orleans' annual Mardi Gras is not lost after the gala celebration. Some of the world's finest jazz can be heard almost any night year-round in the famed French Quarter. Leave the heart of this colorful city to start this fascinating tour into the oak-covered Bayou Teche country where life is flavored with French speech and manners.

Southwest of New Orleans, on US 90, are the flat marshlands criss-crossed by water channels so characteristic of southern Louisiana. Houma is a shrimp-canning and fishing center at the junction of several bayous, and beyond, still on US 90, is Morgan City, the shrimp capital of Louisiana and famous for its colorful festival when the shrimp fleet is blessed. Stop at Franklin, too, to see Oaklawn Manor which reflects the beauty of early plantation home architecture in a setting of live oaks said to have been growing when Columbus discovered America.

Continue on US 90 to New Iberia, "Queen City of the Teche," noted for having one of the finest ante-bellum mansions in the state, "Shadows-on-the-Teche." Built in 1831-34, it is magnificently furnished with period pieces. A short excursion southwest on State 329 leads to Avery Island, the peak of a gigantic salt dome rising above the surrounding marsh. The salt has been mined since Civil War days. The island is also a populous bird sanctuary, and the Jungle Gardens provide exotic specimens from around the world.

State 31 leads to St. Martinville, where the Acadian French refugees from Canada first landed in the early 1800's. The descendants of these people have retained the Acadian dialect and culture in this area—hence the name "Cajun Country." The community is also famous for being the setting of Longfellow's tragic poem "Evangeline," and the famous Evangeline Oak where the unhappy lovers met can be seen near the restored home of Louis Arceneaux, Evangeline's real-life lover. The home is now a museum with exhibits which tell about the life of early Acadian settlers. The Longfellow-Evangeline State Park preserves the pioneer atmosphere of those early days, and for the modern wayfarer there is a craft shop, recreation building, swimming pool and campsites.

Leave St. Martinville on State 96 westward and proceed, via US 90, to Lafayette, which is several towns in one: a traditional Louisiana French community, a modern oil industry center, and a college town. The magnificent house of Governor Alexandre Mouton, one of the oldest homes in town, has been restored as a museum featuring colorful Mardi Gras costumes and a doll collection.

Opelousas, a town founded in the 18th century by the French as a trading post is reached by following US 167. Its history has included an era as district capital under the Spanish and a brief time as state capital during the Civil War.

Travel eastward on US 190, crossing the Atchafalaya River at Krotz Springs, and turn onto State 78 at Livonia. This drive picks up a part of the Great River Road, skirting a portion of the False River, which is a former bend of the Mississippi. Now, fishermen find it to be a rewarding lake yielding fine catches.

Cross the Mississippi on the ferry to reach St. Francisville with its elegant 19th-century homes: Fairview, Rosedown, The Cottage and Afton Villa Gardens. Near the center of town are two beautiful buildings—the Grace Church, an example of English Gothic built in 1858, and Audubon Hall which was built in 1819 and is probably the oldest building in town.

US 61 joins with State 966 which then leads to the Audubon Memorial State Monument. Here is Oakley House, converted into a museum and set in a beautiful 100-acre wildlife sanctuary. John James Audubon worked here on his book, "Birds of America."

Return to US 61 and follow it into Baton Rouge, whose principal sights are Louisiana State University and the State government complex with one of the Nation's few skyscraper state capitols.

Leave Baton Rouge on US 190 and cross a landscape of fields and pine woods to Hammond, the "Strawberry Capital of America." From March through May the town and countryside are a beehive of activity as the berries are picked. The annual Strawberry Festival also takes place during this time.

Continue on US 190 into Covington, a popular residential resort, and turn southward to join with the Lake Pontchartrain Causeway, whose twenty-four miles make it the world's longest. After traversing this vast and beautiful lake, the Causeway connects with Interstate 10 leading back to the heart of exciting and historic New Orleans.
